

PROFESSIONAL AUDIO RECORDERS

GNOME 2M

Professional pocket digital stereo voice recorder with built-in noise cancellation features

Gnome 2M is designed to achieve the best performance possible when recording in real-life noisy environments. It records conversations with extremely high quality with or without compression. Equipped with two high-quality internal microphones or small size external microphones, Gnome 2M provides rich functionality with lots of settings available via an easy-to-use interface.

Gnome 2M has an 8-digit PIN-code access restriction and strong audio data encryption. Rugged metal case insures durability of the unit as well as protects it against detection and jamming.

"Guarantee of Quality and Safety" medal at international forum "Interpolitex" in Moscow

APPLICATIONS

Police and other Law Enforcement Agencies:

Recording during special operations and inside police patrol cars.

Security companies: Recording inside cash-in-transit vans and other recording applications for safety reasons.

Emergency services (fire, ambulance, rescue): Rescue operations tracking and recording inside rescue vehicles.

Legal practices and institutions, businessmen, reporters etc.: Recording of important conversations.

HIGHLIGHTS

- High recording quality ensured by 24 bit ADC (analog-to-digital converter) and highly sensitive microphones.
- 72 dB certified SNR (signal-to-noise ratio), which allows recordings to be used for forensic examinations.
- 90 dB dynamic range.
- Recording time up to 184 hours for a 4 GB.
- Gnome 2M software for MS Windows (9x/ME/NT/2000/XP) allows setting of data protection and PIN codes.
- Recording can be activated by voice, manually or with 5 embedded timers. Voice activation is easily adjusted via graphical user interface displaying current signal levels. It is possible to set different threshold levels for each channel.
- Slim and strong metal case of 115×55×15 mm (4.53×2.17×0.59 in) . The weight is 132 g (4.71 ounces).
- Resistant to detection and jamming.
- Recorded data protection.
- Noise cancellation and speech-enhancement during playback.
- Playback speed adjustment without distorting voice pitch.
- Records to removable media — Compact Flash card.
- Supplied with 2 GB card.
